Summary

Computer Science student currently in the third year, passionate about technology and software development. Eager to gain practical experience through training opportunities and enhance technical and problem-solving skills. Fast learner, adaptable, and able to work effectively both independently and within a team.

Skills

Programming Languages: C++, C#, Backend: ASP.NET MVC, .NET Basics ,Database: SQL Server Web: HTML, CSS, CS Fundamentals: Data Structures, Algorithms, OOP

Database Design, Queries, Joins, Competitive Programming,MVC Architecture.

Soft skills

Communication, Teamwork, Problem Solving, Critical Thinking.

Languages

Arabic ,English

Education

Bachelor of Computer and Information Sciences
Assuit University
10/2023 – 06/2027 | Assuit,Egypt
Currently learning ASP.NET MVC, Data Structures, and Algorithms.

Courses

Data Structures & Algorithms
Assiut University

Web Development using ASP.NET MVC
Unihance

Problem Solving & Competitive Programming (ECPC Preparation)

Projects

Ars Anima (MVC Project)
Web Application using ASP.NET MVC.
Built a full-stack web application following the MVC architectural pattern. Designed and implemented models, views, and controllers to ensure separation of concerns. Focused on clean architecture, maintainability, and structured backend logic.

Face Recognition System
Computer Vision & Deep Learning Application.
Developed a real-time face recognition system using deep learning techniques. Integrated face detection and recognition models to identify individuals from live camera feed with emphasis on accuracy and real-time performance.

Mini Shell
Operating Systems & System Programming
Implemented a simplified Unix-like shell that supports command execution, process creation, and basic system operations. Worked with system calls, process handling, and command parsing to simulate core shell functionality.

Interests

- Programming, Problem Solving, Web Development, Cyber Security, Learning New Skills, Technology.
